

# Simple-Remote-Shell

The user of the client application can type various Unix shell commands, which execute on the server and return results back to the client.

## README

Name: Shuli He

ID: [she77@ucsc.edu](mailto:she77@ucsc.edu)

## Files

bin - compiled program: wd; and outputfile

doc - report - [report link](#).

src - source file: webDownloader

## Usage

Client:

`./rsclient`

example: `./rsclient 127.0.0.1 1234`

Server:

`./rsserver`

example: `./rsserver 1234`
